

Ktsu

AMERICA

THE COMPETITIVE EDGE

KTSU America is proud to represent Kunshan Kensetsu Buhin Co., LTD, a leading manufacturer of construction machinery rollers and idlers. Since 2003 Ktsu has built one of the most complete ranges of track-style roller products available in the world. The Ktsu commitment to you is evident with our recent investments and development of other products such as bulldozer idlers, segments, sprockets and track chains. When undercarriage is thought about; Ktsu is becoming the preferred "go-to" supplier for earthmoving spare parts

Our pledge to the basic fundamentals of Quality, Timely Delivery and Competitive Price along with the added benefits of an elevated customer support offers all of our customers a new gateway to the future within the construction machinery parts industry. Give Ktsu America the opportunity to prove to you how we can reduce your operating costs and provide an assuring confident experience when choosing your supplier.

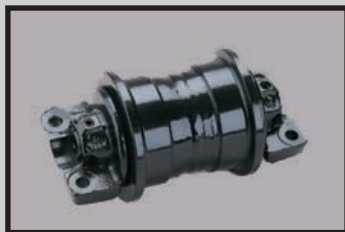

Ktsu

AMERICA

THE COMPETITIVE EDGE

Developed with the highest quality materials in an efficient technical and quality controlled manufacturing environment, we serve the heavy equipment and industrial markets with lower and upper rollers for a large range of excavators and bulldozers. Hundreds of line items designed for a global market of different models and sizes, our roller offering is one of the most complete in the world.

KTSU now offers a wide assortment of idlers for construction machinery excavators, bulldozers and the industrial markets. Listening closely to our dealers and customers we are developing idlers that will service all makes and models demanded.

Complementing our core product in quality our idlers are built by a unique combination of using a forged profile ring and robotic fabrication methods. These high quality idlers are interchangeable with commonly known models such as Cat, Komatsu, John Deere, Case and Kobelco to name just a few. New items are being introduced each month and we invite you to become a part of this fast growing segment of our company.
